Spill Containment and Poly Drums

Keep hazardous materials contained—use spill containment around leak-prone containers and equipment to keep personnel and the environment protected. Flexible containment berms fold for compact storage and can be used indoors or out. Rigid-Lock QuickBerms® feature drive-in/drive-out capability for vehicles. Structured containment products such as pallets, platforms and poly drums are constructed of high-density polyethylene for excellent chemical resistance and impact durability for long life.

Signage and Identification

Military Fire Division Flip Placard

When hazardous chemicals change, just flip to the right symbol. One sign consists of six flip panels, each with a different Fire Division Symbol.

MPG212 12", non-reflective aluminum
MPG224 24", non-reflective aluminum

Military Fire Division Symbols

Use identification symbols to mark where hazards are stored, as specified in Department of Defense Safety Standards DoD 6055.9-STD, Chapter 8. To order, choose a material and add the material code to the sign part number.
